Professional Experience

WEB DEVELOPMENT: SITE DESIGN/DEVELOPMENT

- Design websites from scratch in Photoshop for a variety of businesses and markets.
- Creation of HTML templates from Photoshop files, ensuring full compliance with multiple browsers and mobile devices.
- Create unique interfaces and user-optimized websites to entice even the newest of computer users to easily understand website operation.
- Creation of complex database driven systems, including custom Content Management Systems (CMS) for small businesses, custom checkout systems using a variety of payment gateways and automated tools for the management of hundreds of thousands of products in a single ecommerce website catalog.
- Ability to set up and maintain encryption of sensitive data in databases and secure transfers of data across servers.
- Familiarity with useful APIs such as Google Checkout and Paypal Webpayments Pro (including both credit card gateways and Paypal account gateways).
- Author professional completion reports and documentation of code for developed systems.
- Communicate effectively to non-technical people in order to help them learn tasks to be carried out on the computer.
- Ability to meet hard deadlines and produce quality results in a short amount of time.

SERVER MAINTENANCE: EFFICIENCY AND ORGANIZATION

- ♦ Monitor and maintain server intensive processes so that public operations are not affected.
- ♦ Command line maintenance of Apache, MySQL and PHP machines on servers.
- ♦ Effective and efficient maintenance of hundreds of thousands of lines of code on live servers, backup servers and sandbox development accounts.
- ♦ Help clients setup and maintain email accounts on a variety of computers.
